HOW CODZURE ACTUALLY PROFITS

AGENT	WHO PAYS	WHY THEY PAY	STUDIO ECONOMICS
Deni	Shop	Credit is the Kenyan duka's silent tax	8% of recovered, only after cash lands. Zero if they drop the SMS.
Cheti	Buyer	One bad deposit > 100 tickets. Portals don't sell safety.	KES 2,500 SKU. Ads don't fund this; fear does.
TillMatch	Shop	M-Pesa is the ledger they already have	KES 799/mo SaaS. High retention. Confirm still required to write.

Creative but bankable (12-month studio sketch)

80 shops on Deni + TillMatch ≈ **KES 0.9–1.4M** contribution after take-rate and seats. 400 Cheti tickets ≈ **KES 0.6–1.0M**. Upsell on Codzure's existing KES 150k–320k app packages: +KES 25k–60k agent module per build. Not a chat widget subscription hoping someone "engages."

Does not modify codzure-solutions.vercel.app. Agents attach to NeoBuk and Ask Nyumbani as extra revenue, not a new website.

Studio take this month
KES 41,280

Agent	Payer	Price	Why it clears
Deni	Shop	8% of recovered overdue	Paid only when cash returns. Credit is the duka tax.
Cheti	Buyer	KES 2,500 / title file	One bad land deposit dwarfs the ticket. Portals don't sell safety.
TillMatch	Shop	KES 799 / month	M-Pesa already is the ledger. Matching books is the habit.

Studio sketch: 80 shops (Deni + Till) plus ~400 Cheti tickets in a year is on the order of KES 1.5–2.4M contribution, plus KES 25–60k agent upsell on existing Codzure app packages. Chat subscriptions are not the SKU.
