

Studio profit desk. Does not change <https://codzure-solutions.vercel.app/>

Agents make Codzure money three ways — none of them are chat.

- 1. **Close the estimate.** Demo of an operator wins Android/iOS jobs a freelancer website cannot. +2 packages / year.
- 2. **Fatten the invoice.** Agent module +KES 45,000 on the build they already buy. Prepaid seats +KES 27,500.
- 3. **Charge after the free month.** Their own site already gives month 1 free. Month 2 is KES 2,500/app MRR — the first residual in a project business.

Quiet year model: 6 jobs without agents ≈ KES 900,000. With agents ≈ KES 2.18M (builds + won deals + seats + Cheti tickets). Model, not a guarantee.

How agents put money in Codzure’s account.

Not chat. Not a shop's 8% fantasy as the main story. Codzure today is project invoices + one free month, then silence. Agents are how the studio gets paid again after handover — and how more Get Estimate clicks become KES 150k–320k deals.

EXTRA STUDIO CASH - THIS MODEL YEAR

KES 2,184,000

1. Close the estimate

The live operator demo is the sales weapon. Freelancers ship screens. Codzure ships an employee that records a sale and blocks a bad land deposit. That is why they pick the Android package instead of a KES 40k brochure site.

+2 extra app deals / year ≈ KES 300,000–640,000

2. Fatten the invoice

Line item "Agent module" on the same build they already buy. No new company. No new website. Attach to NeoBuk / Ask Nyumbani / any SME or property app.

+KES 45,000 on ~60% of mobile jobs

3. Charge after the free month

The site already promises one month free maintenance. That month is the trial. Month 2: Deni / Cheti / TillMatch seats. First real MRR in a project shop.

KES 2,500 / app / month × live clients

Quote · Wanjiku Hardware · Githurai

Same client who would have bought Android-only. Toggle what Codzure actually invoices.

Android app (their current SKU) **KES 150,000**

☒ Agent module on this build (Deni + TillMatch wired to sales) **+ 45,000**

☒ Year-1 seats prepaid (month 2-12 after free maintenance) **+ 27,500**

☐ Pull them to full bundle (web + Android + iOS + admin) because the agent needs a portal **+ 170,000**

Codzure invoices now KES 222,500

Then KES 2,500 / month starting month 13 if they stay. That is new money. The old model had KES 0 after handover.

This invoice vs Android-only: KES 72,500 extra for Codzure on the same client visit.

Studio year · 6 mobile jobs (quiet Nairobi year)

	NO AGENTS	WITH AGENTS
Build invoices	KES 900,000	KES 1,170,000
Won because of the demo	0	+2 jobs · KES 390,000
Month-2 seats (18 live apps)	KES 0	KES 540,000 / year
Cheti tickets (Nyumbani clients)	KES 0	KES 84,000
Studio cash	KES 900,000	KES 2,184,000

Profit is not "AI magic." It is (a) a higher close on Get Estimate, (b) a line on the same invoice, (c) the first subscription after the free month they already advertised.

Internal studio desk. Does not edit codzure-solutions.vercel.app. Numbers are a model so the team can argue — not a guarantee.
